Real Estate Services

Solutions by Design Since 1937

Cripe differentiates its internship opportunities as complete immersion experiences for its participants...

Cripe Summer Interns work side by side by professional staff and are an immediate and integral member of the department. In addition to the technical exposure, Cripe interns are provided the opportunity to personally meet with the CEO and President, receive an actual employee annual review, evaluate the internship process and participate in employee activities and events. Cripe believes that the internship experience should provide a 360° view of the “real” employment world.

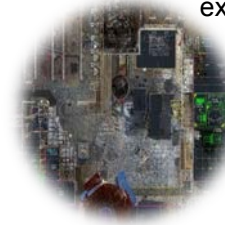

Over our 82-year history, and as part of our continued commitment to our Vision, education and professional development, we have maintained a vibrant and strong internship program. At Cripe, we view the internship experience as a mutually beneficial, stimulating and professional relationship building opportunity.
